

National Address Database Schema

Date: Tuesday, April 17, 2023

The purpose of this document is to lay out the National Address Database (NAD) Schema, including all attribute fields and domains. This schema is in line with the minimum content approach that was devised in the [NAD Summit](#). This schema was developed as part of the [NAD Pilot](#) project, and it is anticipated that this schema will evolve over time as participation in the NAD grows.

Please note that this is not a minimum schema for submission - it is anticipated that many of the fields may be null for many records, or perhaps nonexistent depending on the source data. The "Expected Use" column indicates whether a field is generally "always used", "commonly used", "occasionally used", or "rarely used" within a dataset to give submitters a sense of expectations. (Note: a "commonly used" attribute may be null for the majority of records but is still likely to be utilized within an address database). The proposed schema is a single flat table (non-relational) based largely on the NENA CLDXF standard and NENA NG9-1-1 GIS Data Model (<https://www.nena.org/page/NG911CLDXF>) and <https://www.nena.org/page/NG911GISDataModel>).

Description The National Address Database (NAD) is a spatial database containing address data, point location coordinates, jurisdictions, record-level metadata and other supporting data for addressable locations including structures, some sub-units within those structures, and landmarks as included in the aggregated datasets from providers included therein.

Field	AliasName	Description	Examples
DataType: Length Expected Use Domain AddNum_Pre String: 15 Commonly Used	Address number prefix	The portion of the Complete Address Number which precedes the Address Number itself. A milepost number is a special case of a Complete Address Number. Milepost numbers may be assigned outside the authority of the local address authority and without reference to local address number assignment rules. Consider recognizing certain words and abbreviations as reserved for use with milepost numbers (such as "Milepost", "Mile Marker", "Kilometer", "KmHm").	<ul style="list-style-type: none"> • N6W2 3001 Bluemound Road • A 19 Calle 11 • 194-0 3 Fiftieth Avenue • Milepost 1303 Alaska Highway
Add_Number Integer Always Used *except Landmark and Unnumbered Thoroughfare Domain: AddressNumber	Address number	The numeric identifier for a land parcel, house, building, or other location along a thoroughfare or within a community.	<ul style="list-style-type: none"> • 123 Main Street • N4W6 123 Oak Road • 123 B Highway 88 • Milepost 1303 Alaska Highway
AddNum_Suf String: 15 Commonly Used	Address number suffix	The portion of the Complete Address Number which follows the Address Number itself.	<ul style="list-style-type: none"> • 123 1/2 Main Street • 121 E E Street • B317 A Calle 117 • Milepost 34.4
AddNo_Full String: 100 Always Used *except Landmark and Unnumbered Thoroughfare	Complete Address number	An Address Number, alone or with an Address Number Prefix and/or Address Number Suffix, which identifies a location along a thoroughfare or within a community.	<ul style="list-style-type: none"> • 123 Main Street • 123 1/2 Main Street • N6W2 3001 Bluemound Road • A19 Calle 11 • 194-03 Fiftieth Avenue • Milepost 1303 Alaska Highway
St_PreMod String: 15 Commonly Used	Street Name Pre Modifier	A word or phrase in a Complete Street Name that 1. Precedes and modifies the Street Name, but is separated from it by a Street Name Pre Type or a Street Name Pre Directional or both, or 2. Is placed outside the Street Name so that the Street Name can be used in creating a sorted (alphabetical or alphanumeric) list of street names.	<ul style="list-style-type: none"> • Old North First Street • Alternate North Avenue B • The Oaks Drive • Northwest East 14th Street

Field	AliasName	Description	Examples
DataType: Length Expected Use Domain			
St_PreDir String: 10 Commonly Used Domain: Directional	Street Name Pre Directional	A word preceding the Street Name that indicates the direction or position of the thoroughfare relative to an arbitrary starting point or line, or the sector where it is located.	<ul style="list-style-type: none"> • <u>North</u> Main Street
St_PreTyp String: 50 Commonly Used Domain: StreetName_Type	Street Name Pre Type	A word or phrase that precedes the Street Name and identifies a type of thoroughfare in a Complete Street Name.	<ul style="list-style-type: none"> • <u>Avenue</u> A • <u>Calle</u> Aurora • <u>State Route</u> 4 • <u>County Road</u> 14A
St_PreSep String: 20 Commonly Used Domain: PreType_Separator	Street Name Pre Type Separator	Preposition or prepositional phrase between the Street Name Pre-Type and the Street Name.	<ul style="list-style-type: none"> • Avenue <u>of the</u> Americas • Alameda <u>de las</u> Pulgas • Rue <u>des</u> Etoiles
St_Name String: 254 Always Used *except Landmark	Street Name	The portion of the Complete Street Name that identifies the particular thoroughfare (as opposed to the Street Name Pre Modifier, Street Name Post Modifier, Street Name Pre Directional, Street Name Post Directional, Street Name Pre Type, Street Name Post Type, and Separator Element (if any) in the Complete Street Name.)	<ul style="list-style-type: none"> • <u>Main</u> Street • <u>Boston-Providence</u> Turnpike • Avenue of the <u>Americas</u>
St_PosTyp String: 50 Commonly Used Domain: StreetName_Type	Street Name Post Type	A word or phrase that follows the Street Name and identifies a type of thoroughfare in a Complete Street Name.	<ul style="list-style-type: none"> • Main <u>Street</u> • Boston-Providence <u>Turnpike</u>
St_PosDir String: 10 Commonly Used Domain: Directional	Street Name Post Directional	A word following the Street Name that indicates the direction or position of the thoroughfare relative to an arbitrary starting point or line, or the sector where it is located.	<ul style="list-style-type: none"> • Cherry Street <u>North</u>
St_PosMod String: 25 Commonly Used	Street Name Post Modifier	A word or phrase in a Complete Street Name that follows and modifies the Street Name, but is separated from it by a Street Name Post Type or a Street Name Post Directional or both.	<ul style="list-style-type: none"> • East End Avenue <u>Extended</u> • Banner Fork Road <u>Number 1</u> • Interstate 90 <u>eastbound</u>
StNam_Full String: 255 Always Used *except Landmark	Complete Street Name	Official name of a thoroughfare as assigned by a governing authority, or an alternate (alias) name that is used and recognized.	All the following are complete street names: <ul style="list-style-type: none"> • <u>Main Street</u> • <u>North Main Street</u> • <u>Avenue B</u> • <u>Broadway</u> • <u>Kentucky State Highway 67</u>
Building String: 75 Commonly Used	Building	One among a group of buildings that have the same address number and complete street name.	<ul style="list-style-type: none"> • John F. Kennedy International Airport, <u>Terminal 3</u> • 456 Oak Street, <u>Building A</u>, Apartment 206
Floor String: 75 Commonly Used	Floor	A floor, story, or level within a building.	<ul style="list-style-type: none"> • 800 Jefferson Street, <u>Floor 5</u> • 800 Jefferson Street, <u>5th Floor</u> • 800 Jefferson Street, <u>Mezzanine</u>
Unit String: 75 Commonly Used	Unit	A group or suite of rooms within a building that are under common ownership or tenancy, typically having a common primary entrance.	<ul style="list-style-type: none"> • 422 Via Casitas, <u>Apartment 12</u> • 4300 Flamingo Avenue, <u>Suite 3103</u> • 3100 Tropicana Boulevard, <u>Presidential Suite</u> • 5850 Fifth Avenue, <u>Penthouse</u>

Field DataType: Length Expected Use Domain	AliasName	Description	Examples
Room String: 75 Rarely Used	Room	A single room within a building.	<ul style="list-style-type: none"> 1440 Market Street, Room 450F 123 Main Street, Room 137 125 High Street, Cayuga Room 3850 Maple Street, Rear 1200 Main Street, Lobby
Seat String: 75 Rarely Used	Seat	A place where a person might sit within a building.	<ul style="list-style-type: none"> 2500 Seventh Street, Room 105, Cubicle 23 1101 Madison Street, Registration Desk Studio Theater, Seat T19
Addtl_Loc String: 225 Rarely Used	Additional Location Information	A part of a subaddress that is not a building, floor, unit, room, or seat.	<ul style="list-style-type: none"> 1600 Pennsylvania Avenue Northwest, West Wing U.S. Department of Agriculture South Building, 1400 Independence Avenue, Wing 7 Seattle-Tacoma Airport Main Terminal, Concourse B U.S. Department of Commerce Building, 1401 Constitution Avenue Northwest, Corridor 5 1601 Terminal Street, Loading Dock 1234 Harbor Boulevard, Pier 4, Slip 26
SubAddress String: 255 Commonly Used	Complete Subaddress	One or more elements that identify a subaddress within an addressed feature. A subaddress is a separate, identifiable portion of a feature, the whole of which is identified by a: Complete Street Name, Complete Landmark Name, or Complete Place Name. By definition, the Complete Subaddress can be parsed into one or more of the following elements: Building, Floor, Unit, Room, Seat, and Additional Location Information.	<ul style="list-style-type: none"> 123 Main Street, Apartment 101 1000 Aviation Road, Building 4, Wing 7, Floor 6, Corridor Zero, Office 2B 3. Metro Airport, Terminal A, Gate B10
LandmkName String: 150 Occasionally Used	Landmark Name	The name of a relatively permanent feature of the manmade landscape that has recognizable identity within a particular cultural context.	<ul style="list-style-type: none"> Suzzallo Library, University of Washington United States Capitol Building Empire State Building Winnona Park Elementary School
County String: 100 Always Used Domain: County	County	The name of county or county-equivalent where the address point is located. A county (or its equivalent) is a primary geographic division of a state, federal district, territory, or possession.	<ul style="list-style-type: none"> Winston Orleans Parish Fairbanks North Star Borough Staunton City (an independent city in Virginia, treated as the equivalent of a county)
Inc_Muni String: 100 Always Used	Incorporated Municipality	The name of the legally-defined municipality or other general-purpose local governmental unit with functioning government status, other than a county or county-equivalent, in which the address point is located. Census Bureau maintains a standardized list of all municipality names for the fifty states, DC, and Puerto Rico, posted here: https://www.census.gov/geographies/reference-files/2018/demo/popest/2018-fips.html	<ul style="list-style-type: none"> Haleyville Chicago Athens Olympia Plum Borough Winslow Township Amherst Town
Post_City String: 40 Commonly Used	Postal Community Name	The preferred postal city name for the ZIP Code of an address, as given in the USPS City State file (or "None", if none has been assigned by the USPS, or "Not stated", if the USPS Postal City name cannot be determined).	<ul style="list-style-type: none"> Stanton

Field	AliasName	Description	Examples
DataType: Length Expected Use Domain			
Census_Plc String: 100 Occasionally Used	Census Designated Place	A settled concentration of population that is identifiable by name in the landscape (e.g., referenced on highway signs, business names, etc.), but not legally incorporated under the laws of the state in which it is located, and whose boundaries usually are defined by the Census Bureau in cooperation with state, local, or tribal officials. The authoritative list of census designated place names is found in the Census Gazetteer Files for Places, available here: https://www2.census.gov/geo/docs/maps-data/data/gazetteer/2019_Gazetteer/2019_Gaz_place_national.zip Note that the gazetteer includes other Incorporated Place names as well as CDP names. To select only CDP names, filter by LSAD = "57", or do a text string search for names that include " CDP" in capital letters. This will select all the names of all CDPs outside of Puerto Rico. To find Puerto Rican CDP names, filter by LSAD = "55" or "62", or do a text string search for " comunidad" or " zona urbana".	<ul style="list-style-type: none"> • <u>East Los Angeles CDP</u>, CA • <u>Highlands Ranch CDP</u>, CO • <u>The Woodlands CDP</u>, TX • <u>Cheektowaga CDP</u>, New York
Uninc_Comm String: 100 Commonly Used	Unincorporated Community	The name of an unincorporated community or area, either within an incorporated municipality or in an unincorporated portion of a county or both, whose name and boundary are not identical to a Census-designated Place, where the address point is located. An unincorporated community boundary cannot be coextensive with or subsume as part the entirety of an incorporated municipality. An address record CANNOT have both an Unincorporated Community name AND a Neighborhood name, one or the other.	<ul style="list-style-type: none"> • <u>Poquito Valley</u> (residential area in unincorporated Yavapai County, AZ) • <u>Climax</u> (community in unincorporated Guilford County, NC) • <u>Clarksboro</u>, NJ (in East Greenwich Twp., Gloucester Co., NJ) • <u>Blue Anchor</u>, NJ (in Winslow Twp., Camden Co., NJ)
Nbrhd_Comm String: 100 Commonly Used	Neighborhood Community	The name of a portion, sub-place, or subarea of an incorporated municipality where the address point is located. A neighborhood can only exist within and as a part of an incorporated municipality. It cannot exist in unincorporated areas of counties/equivalents.	<ul style="list-style-type: none"> • <u>Lincoln Park</u> (a neighborhood in Chicago, IL) • <u>Harlem</u> (a neighborhood in New York City, NY) • <u>Regent Square</u> (a neighborhood including portions of Pittsburgh, Swissvale, Edgewood, and Wilkinsburg, Pennsylvania) • <u>Brentwood</u> (a neighborhood in Los Angeles, CA)
NatAmArea String: 100 Occasionally Used	Native American Area	The name of the federally-recognized American Indian reservation (including associated off-reservation trust lands), the state-recognized American Indian reservation, the Hawaiian home land, or the Alaskan Native Village Statistical Area in which the address point is located. For a list of all AIA codes that US Census uses, see https://www2.census.gov/geo/docs/reference/codes/AIAlist.txt	<ul style="list-style-type: none"> • <u>Navajo Nation Reservation</u> • <u>Red Lake Reservation</u> • <u>Waimanalo Hawaiian Home Land</u> • <u>Inalik Alaskan Native Village Statistical Area</u>
NatAmSub String: 100 Occasionally Used	Native American Tribal Subdivision Area	The name of a federally-recognized American Indian tribal subdivision of a federally-recognized American Indian reservation (if any) in which the address point is located.	<ul style="list-style-type: none"> • <u>To'Nanees'Dizi Chapter</u>

Field	AliasName	Description	Examples
DataType: Length Expected Use Domain			
Urbnztn_PR String: 100 Always Used *Puerto Rico addresses	Urbanization Name (PR)	The name of an area, sector, or development of a Puerto Rican municipio in which the address is physically located, that is recognized by municipio authorities, or used by the U.S. Postal Service for delivery of mail to the address.	<ul style="list-style-type: none"> • Urbanización Rio Hondo 4, DJ99 Calle Prados, Bayamon, PR • Villa Andalucía, N99 Calle Frontera, San Juan, PR <p>The urbanization name gives the general vicinity of the address, and often differentiates otherwise identical addresses within a municipio:</p> <ul style="list-style-type: none"> • Urbanización San Souci, A1 Calle 1, Bayamon, PR • Alturas de San Souci, A1 Calle 1, Bayamon, PR <p>Some urbanizations may share the same name but include a number to show that they were independently built. These areas may share repeated streets and house numbers. The use of the number is important to disambiguate otherwise duplicate addresses.</p> <ul style="list-style-type: none"> • Urbanización Santa Juanita 1, 1 Calle 1, Bayamon, PR • Urbanización Santa Juanita 4, 1 Calle 1, Bayamon, PR <p>NOTE: A few urbanizations lack street names or use repeated numeric street names. In those cases, urbanization names can be used in lieu of the street name. This practice is mostly used by the US Postal Service.</p> <ul style="list-style-type: none"> • 10 Urbanización Los Maestros, Ponce, PR
PlaceOther String: 100 Rarely Used	Other Place Name	An additional place name that is either: 1. A different type of place name that does not fit in any of the categories defined above; or, 2. An additional community, tribal, or urbanization place name, when one more of one of those types of place names is deemed useful in the address record.	<ul style="list-style-type: none"> • Berkley Mews (residential) Subdivision, of Dixeyland neighborhood / section / district in Calhounish County, Southstate, USA • BigEast City, Downtown Special Tax District • WestCoastville Urban Growth Area • Colonial Town Historic District, Oldstate, USA • Rustburgh Brownfields District • College Heights Estates, Prince George's County, Maryland
PlaceNmTyp String: 50 Rarely Used *Required when Other Place Name is populated	Other Place Name Type	The type of Place Name used in an Address is required when Other Place Name is populated. Examples: "Historic District," or "Commune"	<ul style="list-style-type: none"> • College Heights Estates Historic District, Prince George's County, Maryland
State String: 2 Always Used Domain: State	State	The names of the US states and state equivalents: the fifty US states, the District of Columbia, and all U.S. territories and outlying possessions. A state (or equivalent) is "a primary governmental division of the United States." The names are represented by their two-letter USPS or ANSI abbreviation.	<ul style="list-style-type: none"> • Chicago, Illinois • Frederiksted, Virgin Islands
Zip_Code String: 7 Commonly Used	ZIP Code	A system of 5-digit codes that identifies the individual Post Office or metropolitan area delivery station associated with an address.	<ul style="list-style-type: none"> • Birmingham, AL 35305

Field	AliasName	Description	Examples
DataType: Length Expected Use Domain			
Plus_4 String: 4 Occasionally Used	Zip Plus 4 Addition	A 4-digit extension of the 5-digit Zip Code that, in conjunction with the Zip Code, identifies a specific range of USPS delivery addresses.	<ul style="list-style-type: none"> Birmingham, Alabama 35242-<u>3426</u>
UUID GUID: 38 Always Used	Address UUID	The Universally Unique Identifier (UUID) assigned to an address.	{550e8400-e29b-11d4-a716-446655440000}
AddAuth String: 100 Commonly Used	Address Authority	The name of the authority (e.g., municipality, county) that created or has jurisdiction over the creation, alteration, or retirement of an address.	<ul style="list-style-type: none"> Florence County, SC City of Boulder, CO University of Georgia, Athens, GA (for addresses within the campus) Hartsfield-Jackson International Airport, Clayton County, GA (for addresses within the airport)
AddrRefSys String: 75 Occasionally Used	Address Reference System Name	The name of the address reference system within whose extent the address is located. Names the area within which the address can be expected to be unique. 1. The Address Reference System Name, along with the Address Authority, identifies the address reference system whose rules govern the construction and assignment of addresses for the area within which the address is located. 2. The area itself is defined by the Address Reference System Extent, a boundary polygon that is a required attribute for every address reference system. 3. Addresses, street names and ranges, landmark names, and place names should be unique within an address reference system area. 4. Exceptions sometimes occur. For example, occasionally two different streets in an area will have the same name and the same address ranges. Exceptions can be flagged using the Address Anomaly Status.	<ul style="list-style-type: none"> <u>Boulder County Mountain Addressing System</u> <u>Boulder County Flatland Addressing System</u>
Longitude Double Always Used Domain: Longitude	Address Longitude	The angular distance of a location east or west of the prime meridian of the WGS84 Datum, expressed in decimal degrees.	<u>-84.29049105</u>
Latitude Double Always Used Domain: Latitude	Address Latitude	The angular distance of a location north or south of the equator as defined by the WGS84 Datum, expressed in decimal degrees.	<u>33.77603207</u>
NatGrid String: 50 Always Used	National Grid Coordinates	The USNG is an alphanumeric point reference system that overlays the Universal Transverse Mercator (UTM) numerical coordinate system. A USNG coordinate consists of three parts, the: Grid Zone Designation (GZD) for worldwide unique geoaddresses (two digits plus one letter, developed from the UTM system). 100,000-meter Square Identification for regional areas (two letters). And the Grid Coordinates for local areas (always an even number of digits between 2 and 10 depending upon precision)	<u>18SUJ2348306479</u>
Elevation Small Integer (Short) Occasionally Used	Address Elevation	Distance of the address in specified units above or below a vertical datum, as defined by a specified vertical coordinate reference system. The NAD elevation reference system and datum is not yet specified. Until it is specified, NAD data providers who provide elevation data should identify the vertical coordinate reference system in the metadata accompanying the address records.	<u>1023</u>

Field	AliasName	Description	Examples
Data Type: Length Expected Use Domain			
Placement String: 25 Commonly Used Domain: Placement	Address Placement	The method used to place an Address Point within an addressed location. State where the Address Point is placed within the addressed location. An Address Placement value must be associated with an Address Point.	<u>Structure - Rooftop</u>
AddrPoint String: 50 Always Used	Address Point Well Known Text	A mappable point, constructed as a Well Known Text (WKT) Point or Point Z, using the following address attributes: ([Address Longitude] [Address Latitude] [Address Elevation])	(Point) <u>-76.931253 38.847555</u> (Point Z) <u>-76.931253 38.847555 300</u>
Related_ID String: 50 Rarely Used *Required when Related ID is populated	Related Address Identifier	The identifier of an address that is related to the identifier of another address. Relate addresses to each other where useful (e.g., landmark addresses to corresponding thoroughfare addresses; predecessor addresses to successor addresses; official address to alias address; etc.)	<ul style="list-style-type: none"> • 123 Main St (Address ID = 1000) is also known as the "Grand Old Office Building" (a landmark name, Address ID = 5000). Then for: Related Address ID = 5000, Address ID = 1000, Address Relation Type = Landmark Name Alias • Related Address ID = 1000, Address ID = 5000, Address Relation Type = Official Street Address
RelateType String: 50 Rarely Used *Required when Related ID is populated	Address Relation Type	The manner in which an address identified by a Related Address ID is related to an address identified by an Address ID.	<ul style="list-style-type: none"> • 123 Main Street was created years ago when 101 Main Street (Address ID = 250) was subdivided into several properties. Then for: Related Address ID = 250, Address ID = 1000, Address Relation Type = Historical Predecessor • This particular part of Main Street is part of State Route 88. 123 Main Street (Address ID = 1000) is the official address, but 123 State Route 88 (Address ID = 8943) is also recognized. Then for: Related Address ID = 8943, Address ID = 1000, Address Relation Type = Alias Address Related Address ID = 1000, Address ID = 8943, Address Relation Type = Official Address
ParcelSrc String: 50 Occasionally Used	Address Parcel Identifier Source	The permanent identifier for the agency, organization, or jurisdiction that assigns and maintains the Address Parcel Identifier. The NAD scope will not extend to verifying or validating the names of source agencies provided by the data providers.	<u>Wake County (NC) Revenue Department</u>
Parcel_ID String: 50 Occasionally Used	Address Parcel Identifier	The primary permanent identifier, as defined by the Address Parcel Identifier Source, for a parcel that includes the land or feature identified by an address. A parcel is "a single cadastral unit, which is the spatial extent of the past, present, and future rights and interests in real property." Address-parcel relationships are complex and not necessarily tracked by local authorities. The NAD scope will not extend to verifying or validating any parcel IDs provided by the data providers.	<u>5142301020000</u> (= the address is associated with the land or a feature within parcel 5142301020000)
AddrClass String: 50 Occasionally Used Domain: Address Classification	Address Classification	The class of the address as defined in the Classification Part of the FGDC address data standard.	<ul style="list-style-type: none"> • <u>Numbered Thoroughfare Address</u> • <u>Unnumbered Thoroughfare Address</u> • <u>Landmark Address</u> • <u>Community Address</u>

Field	AliasName	Description	Examples
DataType: Length Expected Use Domain			
Lifecycle String: 50 <i>Occasionally Used</i>	Address Lifecycle Status	The lifecycle status of the address.	<ul style="list-style-type: none"> • Potential • Proposed • Active • Retired
Effective Date <i>Commonly Used</i>	Start Date	The earliest date on which the address is known to exist.	20050413
Expire Date <i>Commonly Used</i>	End Date	The date on which the address is known to no longer be valid. This field is used when the time and date of a change is known. For example, the time and date an annexation takes effect, and the previous boundary is retired.	20110209
DateUpdate Date <i>Always Used</i>	Last Revision Date	The date that the address record was last modified or when not provided, the date the record was last updated within the NAD.	20191231 (=December 31, 2019)
AnomStatus String: 50 <i>Occasionally Used</i>	Address Anomaly Status	A status flag, or an explanatory note, for an address that is not correct according to the Address Reference System that governs it, but is nonetheless a valid address.	An address that has an even Address Number Parity but is located on the odd-numbered side of the street.
LocatnDesc String: 75 <i>Occasionally Used</i>	Location Description	Do NOT include Personally identifiable information (PII); A text description providing more detail on how to identify or find the addressed feature.	<ul style="list-style-type: none"> • <u>White house at intersection</u> • <u>400 yards west of water tank</u>
Addr_Type String: 50 <i>Commonly Used</i>	Address Use Type	Do NOT include Personally identifiable information (PII); A category of real-world phenomena with common properties whose location is specified by an address. No domain of values can be established within the NAD. The NAD will accept any value (or none at all), as free text, with no expectation that types will be consistent from jurisdiction to jurisdiction.	<ul style="list-style-type: none"> • <u>Residential</u> • <u>Commercial</u> • <u>Government</u> • <u>College</u> • <u>Farm</u>
DeliverTyp String: 50 <i>Occasionally Used</i> Domain: Delivery Type	Delivery Address Type	Whether the Delivery Address includes or excludes the Complete Subaddress.	<ul style="list-style-type: none"> • Subaddress Included (for 123 Main Street, <i>Apt. 1</i>) • Subaddress Excluded (for 123 Main Street)
NAD_Source String: 75 <i>Always Used</i>	NAD Data Provider	Organization or person providing data directly to the NAD.	<ul style="list-style-type: none"> • <u>Municipality of Anchorage, Alaska</u> • <u>OCTO DATA TEAM District of Columbia</u> • <u>New York State GIS Program Office</u>
DataSet_ID String: 254 <i>Always Used</i>	Data Set Identifier	An identifier in each record of a transmitted dataset, assigned by the sender or the receiver of the dataset, to associate each record of the dataset to the file-level metadata that accompanies the dataset.	<ul style="list-style-type: none"> • <u>21414</u> • <u>SSAP157959@lexingtonky.gov</u>
